

IP AUDIO

1. IP Audio – Network Communication and Sound Solutions

Brand: SPON – Advanced IP Technology

Protocols: SIP, RTP, ONVIF, PoE

Applications: Corporate buildings, universities, transport terminals, logistics warehouses

Projects requiring flexible, distributed systems without costly centralized infrastructure

Key technical features:

Network audio transmission (unicast/multicast)

IP intercoms with noise cancellation and software control

Integration with CCTV, access control, and IP telephony

Scheduled announcements, music broadcasting, real-time notifications

PoE solution: power and data over a single cable

Competitive advantages:

- ✓ Communication without physical boundaries (LAN/WAN)
- ✓ Software-scalable, ideal for expanding projects
- ✓ Quick installation without centralized cabling
- ✓ High compatibility with security platforms
- ✓ Ideal for integration into existing networks
